

## People's Vaccine Alliance Ireland – stunt outside Leinster House

Last week, top scientists, health professionals and academics from Ireland and around the world, gathered to talk about how Ireland should be responding to global vaccine inequity. A short 9-minute [video](#) will give a flavour of this important contribution to the debate around vaccine justice.

Following this event, more than 350 leading scientists and medical professionals signed a public statement urging the Irish Government to support the generic production of Covid-19 vaccines and treatments to address global vaccine inequity.

The People's Vaccine Alliance Ireland, of which AMRI are an active member, will be joining Access to Medicines Ireland, who are organising a stunt:

**Date/Time: Tuesday 30 November, 1pm**  
**Location: outside Leinster House**

We will be tolling bells every 4 seconds in 5-minute slots. This is to represent COVID19 related deaths that occur every 4 seconds, and in memory of the 5 million deaths globally to the virus. There will also be minute silences and uses of a megaphone to call out quotes from leaders, myths around Covid19 and give rebuttals.

If you would like to support vaccine equity, please write or call you local TD to let them know ([click here](#) to view the letter)

**ONE PERSON**  
**DIES** FROM **COVID**  
**EVERY** **4** **SECONDS**
